Normal Course.

This course consists of the ordinary Grammar-School branches and the studies of the first two years of the Higher Normal Course.

No examination for admission is required, but pupils will be classed according to their attainments.

This course is formed to meet the immediate demand for teachers throughout the State. A certificate of graduation will be given to those who complete this course.

Rhetorical exercises and weekly Bible lessons are required throughout all the courses.

GENERAL INFORMATION.

MEMBERSHIP.

For membership in the Institution a person must have a good moral character, and must sign a pledge to abstain from the use of all intoxicating drinks and tobacco in every form, while a member of the school.

Pupils from other schools must present certificates of honorable dismissal.

Applications for admission should be made at least a month before the beginning of the school year.

Pupils should enter the first day of the school year that they may be immediately classified and thus lose no time. Students in regular classes lose their membership when absent any part of the year. Those pursuing a regular course are held amenable to the authority of the school during vacation, as well as during term time.

Those who have not a fixed purpose to improve their time, and an earnest desire to fit themselves for usefulness, should not seek admission, as the presence of such is not tolerated.

STUDENT AID.

Several students have been aided during past years by the Peabody Fund and contributions from the friends of popular education. It is expected that this help will be continued.

There are special funds available for those proposing to enter upon the Theological Course, provided they are able to meet the conditions required for membership in that course.

The only *permanent* fund is the "Plainfield Scholarship" of three hundred dollars.

Persons should not come to the school hoping to receive aid until they have applied for it, and received a favorable answer. Those applying should state their pecuniary circumstances, their advancement in their studies, and, as far as possible, what pursuit they intend to follow.

It is expected that those who are aided will, when able, return the amount to aid others.

MUSIC.

Instruction is given in both Vocal and Instrumental Music.

BIBLICAL INSTRUCTION.

Special attention is given to instruction in the Bible in order to prepare students for work in Sunday Schools, and for other forms of Christian service.

GRAVES LIBRARY.

By the liberality of R. R. Graves, Esq., of New York, and a few other friends, the library now contains between two and three thousand volumes. Mr. Graves has also given a permanent endowment of five thousand dollars, which secures its steady growth.

In connection with the Library is a Reading Room, well supplied with the leading papers and periodicals of the country, and to both the students have free access.

APPARATUS.

A good beginning has been made in procuring Philosophical Apparatus. A complete set of Surveyor's Instruments has also been procured.

Additions will be made from time to time.

STATE APPROPRIATION.

At the last session of the Georgia Legislature an act was almost unanimously passed making an annual appropriation of eight thousand dollars to this Institution. The appropriation was made on condition that the Board of Visitors of the State University should also visit this school; that the money should not be paid by the Governor till the Commissioners, Chancellor H. H. Tucker, D. D., Prof. William LeRoy Broun, A.M., and Professor William L. Mitchell, A.M., members of the Faculty of the University of Georgia, had approved the plan of the Trustees for its expenditure, and that the Institution should educate, free of tuition, one pupil for every member of the House of Representatives, to be nominated by the members. It is hoped that these enlarged facilities will be made use of by those for whom they are designed, and that members of the Legislature will interest themselves to secure the attention of such worthy young persons as reside in their counties. In this way the pressing demand for Common-School teachers may be early supplied.

TEACHING.

Nearly all of those who are sufficiently advanced in scholarship aid themselves by teaching. The demand for teachers is usually in excess of the supply.

County Superintendents of Schools, and others desiring teachers from this Institution, will find it for their interest to arrange their schools, if possible, so as to include its summer vacation, viz., the months of July, August and September. Communications from all such will be promptly attended to.

Students of this Institution desiring to teach will be furnished with certificates of membership and standing. As a means of protection from imposition, applicants for schools claiming to be from the Atlanta University should be required to exhibit such certificates.

HISTORY.

This Institution was begun in accordance with a plan formed early in the history of the work of American Missionary Association in the South.

The Freedman's Bureau, the Association, and the State of Georgia, with a few friends, have furnished the means for what has been done.

Atlanta, because of its central position and healthful climate, was selected as the best place for such an institution. A charter was obtained in October, 1867, and a Board of Trustees formed.

The Trustees now hold about sixty acres of land on one of the highest elevations in the city, and commanding a fine view in all directions.

The first building was completed in September, 1869. It is a substantial, four-storied, brick building, neatly finished, and contains parlors, dining rooms, kitchen, bath-rooms, and dormitories for forty girls. Another building of about the same style, in which are temporary school rooms, and dormitories for one hundred boys, has since been completed. This building is now heated throughout by steam.

DESIGN.

The plan of the Institution for the immediate future, contemplates an addition to the ladies' hall, and also a central building, for chapel, school rooms, lecture rooms, cabinet, library, &c.

It is expected that a majority of the students will engage in teaching, and instruction in all departments is adapted to that end. Earnest efforts are made to induce young men to prepare for the ministry.

The Institution stands on the broadest possible platform, and while intended to be thoroughly Christian, is in no respect sectarian. It offers its advantages to all of either sex, without regard to sect, race, color, or nationality.

It is desired to make the school, as far as possible, a *home* for those who attend. Not only their intellectual, but also their social, moral and religious culture, receive careful attention.

WANTS.

The school being without endowments, is dependent upon the American Missionary Association for all support not derived from other sources.

There is pressing and immediate need of an addition to the Ladies' Hall.

Other needs are such as all young Colleges have—building, endowments, scholarships, reference books, maps, apparatus, &c.

It is hoped that the time is not far distant when funds will flow into the treasury of this Institution as freely as they do into those of colleges in other parts of the country.

EXPENSES.

Tuition and board, including furnished rooms, fuel, lights and washing, - - - - -	per month.	\$12.00
Tuition for day pupils, - - - - -	" "	2.00
Instruction in Instrumental Music, - - - - -	" "	2.00
Use of Instrument one hour a day, - - - - -	" "	1.00

All payments must be made in advance on the first day of each month.

All pupils are required to work for the Institution at least one hour a day. This requirement makes the above low charges possible.

Remittances in payment of bills should be made by money-orders, drafts, in registered letters, or by express.

Make money-orders and drafts payable, during 1875-76, to E. A. Ware, and address all moneys to him. Receipts will be promptly returned.

MISCELLANEOUS.

Each pupil should bring a Bible. It is needed for private reading, for the Sunday School, and for the weekly Bible lesson.

It is well to bring the text books formerly used.

All should be provided with *warm* clothing.

Young ladies should have rubbers and waterproofs.

Economy and good taste demand plain and simple clothing. Parents are urged to co-operate with teachers in seeing that none other is worn. No extra dress is required for the close of school.

Letters should be directed to Atlanta University, Atlanta, Ga.

Experience has taught that much evil comes from pupils receiving food from home. They are, therefore, not allowed to receive it. *Friends will please not send it.*

Students who do not board at their homes are not allowed to board out of the Institution, except by special permission.

Boarders are expected to furnish their own towels.

RHETORIC—Art of Discourse (Day).

MATHEMATICS—Algebra (Loomis); Plane Geometry (Loomis).

EVIDENCES OF CHRISTIANITY—Hopkins.

JUNIOR YEAR.

LATIN—Odes of Horace (Chase); Tacitus (Tyler).

MATHEMATICS—Solid and Spherical Geometry (Loomis); Trigonometry and Surveying (Loomis).

SCIENCE—Chemistry (Youmans); Geology (Dana); Botany (Gray).

SENIOR YEAR.

MENTAL PHILOSOPHY—Wayland.

LOGIC—Atwater.

MORAL PHILOSOPHY—Fairchild.

POLITICAL PHILOSOPHY—Civil Liberty and Self Government (Lieber).

HISTORY—History of Civilization (Guizot).

SCIENCE—Natural Philosophy (Snell's Olmsted); Astronomy (Snell's Olmsted).

Agricultural Course.

The requirements for admission to this course are the same as for the Scientific Course.

The studies are also the same, excepting that, during Junior and Senior Year, Agricultural Chemistry, Entomology, Zoölogy, &c., are taught in place of an equal number of the studies of that course.

About forty acres of land belonging to the Institution are now fenced. The laying out and cultivating of this tract will furnish pupils practical instruction in gardening. All male students are required to work at least one hour a day.

The degree of B. S. will be given to graduates from this course.

College Preparatory Course.

For admission to this course pupils must be thoroughly prepared in Reading, Writing, Spelling, Arithmetic, Geography, English Grammar and United States History.

FIRST YEAR.

LATIN—Elementary Book (Harkness).

ENGLISH COMPOSITION—First Lessons (Quackenbos).

MATHEMATICS—Elementary Algebra (Davies).

HISTORY—General (Anderson).

Good Morals and Gentle Manners (Gow).

Reading, Writing and Spelling.

SECOND YEAR.

LATIN—Grammar, Reader, Composition (Harkness); *Viri Romæ* (Smith).

GREEK—Grammar (Hadley); First Lessons (Boise).

MATHEMATICS—Arithmetic (Sanford).

PHYSICS—Elementary (Steele).

HISTORY—General (Anderson).

THIRD YEAR.

LATIN—Cicero, Four Orations against Catiline, (Stuart); Virgil, Three books of *Æneid*, (Chase); Composition (Harkness).

RHETORIC—Art of Discourse (Day).

MENTAL PHILOSOPHY—Wayland.

LOGIC—Atwater.

MORAL PHILOSOPHY—Fairchild.

EVIDENCES OF CHRISTIANITY—Hopkins.

MATHEMATICS—Algebra (Loomis); Plane Geometry (Loomis).

Normal Course.

This course consists of the ordinary Grammar-School branches and the studies of the first two years of the Higher Normal Course.

No examination for admission is required, but pupils will be classed according to their attainments.

This course is formed to meet the immediate demand for teachers throughout the State. A certificate of graduation will be given to those who complete this course.

Rhetorical exercises and weekly Bible lessons are required throughout all the courses.

GENERAL INFORMATION.

Membership.

For membership in the Institution a person must have a good moral character, and must sign a pledge to abstain from the use of all intoxicating drinks and tobacco in every form, while a member of the school.

Pupils from other schools must present certificates of honorable dismissal.

Applications for admission should be made at least a month before the beginning of the school year.

Pupils should enter the first day of the school year that they may be immediately classified, and thus lose no time. Students in regular classes lose their membership when absent any part of the year. Those pursuing a regular course are held amenable to the authority of the school during vacation, as well as during term time.

Those who have not a fixed purpose to improve their time, and an earnest desire to fit themselves for usefulness, should not seek admission, as the presence of such is not tolerated.

Student Aid.

Several students have been aided during past years by the Peabody Fund and contributions from the friends of popular education. It is expected that this help will be continued.

The only *permanent* fund is the "Plainfield Scholarship" of three hundred dollars.

Persons should not come to the school hoping to receive aid until they have applied for it, and received a favorable answer. Those applying should state their pecuniary circumstances, their advancement in their studies, and, as far as possible, what pursuit they intend to follow.

It is expected that those who are aided will, when able, return the amount to aid others.

Music.

Instruction is given in both Vocal and Instrumental Music.

Biblical Instruction.

Special attention is given to instruction in the Bible in order to prepare students for work in Sunday Schools, and for other forms of Christian service.

Graves' Library.

By the liberality of R. R. Graves, Esq., of New York, and a few other friends, the library now contains between two and three thousand volumes. Mr. Graves has also given a permanent endowment of five thousand dollars, which secures its steady growth.

In connection with the Library is a Reading Room, well supplied with the leading papers and periodicals of the country, and to both the students have free access.

Apparatus.

A good beginning has been made in procuring Philosophical Apparatus. A complete set of Surveyor's Instruments has also been procured. Additions will be made from time to time.

Teaching.

Nearly all of those who are sufficiently advanced in scholarship aid themselves by teaching. The demand for teachers is usually in excess of the supply.

County Superintendents of Schools, and others desiring teachers from this Institution, will find it for their interest to arrange their schools, if possible, so as to include its summer vacation, viz., the months of July, August and September. Communications from all such will be promptly attended to.

Students of this Institution, desiring to teach, will be furnished with certificates of membership and standing. As a means of protection from imposition, applicants for schools claiming to be from the Atlanta University should be required to exhibit such certificates.

Design.

It is expected that a majority of the students will engage in teaching, and instruction in all departments is adapted to that end. Earnest efforts are made to induce young men to prepare for the ministry.

The Institution stands on the broadest possible platform, and while intended to be thoroughly Christian, is in no respect sectarian. It offers its advantages to all of either sex, without regard to sect, race, color, or nationality.

It is desired to make the school, as far as possible, a *home* for those who attend. Not only their intellectual, but also their social, moral and religious culture, receive careful attention.

Wants.

The school being without endowments, is dependent upon the American Missionary Association for all support not derived from other sources.

There is a pressing and immediate need of an addition to the Ladies' Hall.

Other needs are such as all young Colleges have—building, endowments, scholarships, reference books, maps, apparatus, &c.

It is hoped that the time is not far distant when funds will flow into the treasury of this Institution as freely as they do into those of colleges in other parts of the country.

Expenses.

Tuition and board, including furnished rooms, fuel, lights and washing,	- - - - -	per month.	\$12.00
Tuition for day pupils,	- - - - -	" "	2.00
Instruction in Instrumental Music,	- - - - -	" "	2.00
Use of Instrument one hour a day,	- - - - -	" "	1.00

All payments must be made in advance on the first day of each month.

All pupils are required to work for the Institution at least one hour a day. This requirement makes the above low charges possible.

Remittances in payments of bills should be made by money-orders, drafts, in registered letters, or by express.

Make money-orders and drafts payable, during 1876-7, to E. A. Ware, and address all moneys to him. Receipts will be promptly returned.

Miscellaneous.

Each pupil should bring a Bible. It is needed for private reading, for the Sunday School, and for the weekly Bible lesson.

It is well to bring the text books formerly used.

All should be provided with *warm* clothing.

Young ladies should have rubbers and waterproofs.

Economy and good taste demand plain and simple clothing. Parents are urged to co-operate with teachers in seeing that none other is worn. No extra dress is required for the close of school.

Letters should be directed to Atlanta University, Atlanta, Ga.

Experience has taught that much evil comes from pupils receiving food from home. They are, therefore, not allowed to receive it. *Friends will please not send it.*

Students who do not board at their homes are not allowed to board out of the Institution, except by special permission.

Boarders are expected to furnish their own towels.

Keeping or using fire-arms on the premises is forbidden.

History.

Immediately on the close of the late war, the Freedman's Bureau, together with various Northern Aid Societies, began the work of education among the freed people of Georgia and adjoining States. By far the most prominent of these societies, was the American Missionary Association, which, for several years, supported nearly one hundred teachers in Georgia. It was early felt by these teachers, and by the officers of the Bureau and the Association, that a school for higher education was needed. Atlanta, because of its central and healthful location, was chosen as the best place for such a school.

In October, 1867, a Board of Trustees was formed, and a charter granted by the Superior Court of the county. Money was secured from the Bureau, and from other sources, and a site of about fifty acres, on high ground, in the western part of the city, was purchased. In June, 1869, the cornerstone of the first building was laid. During the summer the building was erected, and in October was occupied by the school. It is a plain, four-storied, brick building, containing sleeping-rooms for about forty pupils, and also parlor, dining-room, kitchen, &c. It was designed for a girls' dormitory, but during the first year, furnished all accommodations, both school and boarding, for the entire school. It was much crowded, and the inconvenience of this arrangement was very great. In August of 1870, another building of the same style, but larger, containing sleeping-rooms for about sixty boys, besides temporary school-rooms, was completed. In the summer of 1871 this building was enlarged by a wing, providing rooms for about forty pupils, and other school-rooms. This entire building is now heated by steam. The trustees hold about sixty acres of land and the above described buildings. It is hoped that the immediate future will see an addition to the Ladies' Hall, and a central building containing chapel, library, laboratory, recitation and lecture-rooms.

The Legislature of Georgia, in 1870, appropriated to this school \$8,000. The same amount was received in 1871 and in 1873. In 1874 a bill was almost unanimously passed making an annual appropriation of \$8,000. This bill was entitled "An act equitably to adjust the claims of the colored people to a share of the Agricultural Land Scrip." It made the appropriation on condition that the Board of Visitors of the University of Georgia should also visit this school; that the money should not be paid by the Governor till a commission of three members of the Faculty of the University

of Georgia had approved the plan of the Trustees for the expenditure of the money, and that the school should educate free of charge for tuition, one pupil for every member of the House of Representatives, to be nominated by the members. Although a vigorous effort has been made by the State School Commissioner, and others, for the past two years to repeal this bill, it is still in force.

At the time of the first appropriation, the Governor appointed a Committee, whose Chairman was Gov. Joseph E. Brown, to examine the school. The following are extracts from their report made in 1871 :

“The Atlanta University was incorporated in the year 1867, and has now been in active operation about two years. Designed to afford opportunity for thorough education to members of a race only recently elevated to citizenship, and much of its prescribed curriculum of studies being of a higher grade than that of other institutions in the South, whose doors are opened to pupils of color, it is, in our section of the country, a novel enterprise, concerning the success and usefulness of which much interest is felt all over the Union.

“We, therefore, deemed it our duty, not only to give the examination the strictest attention, but also to carefully scrutinize everything pertaining to the management of the institution.

“At every step of the examination we were impressed with the fallacy of the popular idea (which, in common with thousands of others, a majority of the undersigned have heretofore entertained) that the members of the African race are not capable of a high grade of intellectual culture. The rigid tests to which the classes in Algebra and Geometry, and in Latin and Greek, were subjected, unequivocally demonstrated that under judicious training, and with persevering study, there are many members of the African race who can attain a high grade of intellectual culture. They proved that they can master intricate problems in mathematics, and fully comprehend the construction of difficult passages in the classics.

“Many of the pupils exhibited a degree of mental culture which, considering the length of time their minds have been in training, would do credit to members of any race.

“We fully satisfied ourselves that the system of intellectual and moral training adopted in this institution is eminently practical. The rudiments of education are taught most thoroughly; reading, writing, and arithmetic receiving their full share of attention.

“We found abundant evidences of the very judicious moral training to which the pupils of the institution are daily subjected. Their satisfactory

answers to questions, tended to define the character of their moral training, their polite behavior, general modesty of demeanor, and evident economy and neatness of dress, are indicative of a conviction on the part of the pupils that they are being educated for usefulness, and not for mere ostentation or to gratify a selfish ambition.

“ We inspected the buildings and found them admirably adapted to the purposes for which they were erected. They are kept in a neat and cleanly condition. Everywhere in and about them an intelligent regard is had for those sanitary rules, so important to be observed in all institutions like this, where numerous individuals are daily and nightly assembled.

“ It is patent that judicious economy pervades the management of every department of the institution. We were convinced that the funds placed in the hands of the managers have been wisely expended.

“ In discharging the duty to which we were assigned by your Excellency for considerations not necessary to recount, we have felt that it was our duty to give to you, and through you to the public, a report strictly according with the facts.

“ Of the justice of this report the incredulous can satisfy themselves by visiting the institution, as we have done, with an eye single to the truth.”

Since 1874 the school has been examined by a Committee of the Board of Visitors of the University of Georgia. The following is their report made in June of last year:

“After carefully and patiently listening to the several exercises, and critically scanning each recitation conducted in our presence, the committee is gratified to state—

“ 1. That the examinations were fairly managed, and afforded a true test of the acquirements of each pupil.

“ 2. That the progress made by the students, as a whole, is highly satisfactory, while there were not wanting many instances of superior merit and proficiency among their number.

“ 3. We are pleased to bear testimony to the excellent order, decorum, and respectful demeanor of the entire school.

“ 4. The corps of instructors, without exception, seem well qualified for the discharge of their duties, and evince much system and thoroughness in the method of imparting knowledge.

“ 5. The floors, walls, recitation-rooms and dormitories of the college edifice are in a scrupulously neat condition, no ink spots, knife marks or other blemishes being visible.

“In conclusion, the committee, whilst feeling that it is not their province to discuss either the financial or political surroundings of the University, other than to say that they see no evidence of a misapplication of the subsidy voted by the State, are, in justice, forced to make the following admissions, to wit: That so long as no improper or sinister attempt is made to foster jealousies and hatred against the whites among the pupils of the school, and to encourage future antagonisms, or social equality maxims, and whilst, as at present, wholesome discipline and good morals seem to obtain, the University cannot fail to achieve much good for the African race.”

The following table shows the number of teachers and pupils each year since the school was opened :

	69-70	70-1	71-2	72-3	73-4	74-5	75-6

In 1871 one young man graduated from the Preparatory Department, and entered Oberlin College, where he graduated in 1875. In 1872 another left the Freshman Class and entered West Point, where he still remains—the only colored cadet. In 1873, and each year since, a class of four has graduated from the Higher Normal Department. It is expected that this year six will graduate from College, four from the Higher Normal Department, and also a class of three prepared for the ministry.

The graduates, and others who have left before finishing their course, to the number of about one hundred, are engaged in teaching during a part or all of the year. Besides these, during the three months of the last summer vacation, one hundred and fifteen members of the school were also teaching. It is estimated that nearly ten thousand people were taught, for a longer or shorter time, last year, by those connected with this institution. In addition to the great good accomplished by direct teaching, a very great influence has been exerted by these teachers in arousing an interest in education, and in creating a demand for a common school system.

Normal Course.

This course consists of the ordinary Grammar-School branches and the studies of the first two years of the Higher Normal Course.

No examination for admission is required, but pupils will be classed according to their attainments.

This course is formed to meet the immediate demand for teachers throughout the State. A certificate of graduation will be given to those who complete this course.

Rhetorical exercises and weekly Bible lessons are required throughout all the course.

GENERAL INFORMATION.

Membership.

For membership in the Institution a person must have a good moral character, and must sign a pledge to abstain from the use of all intoxicating drinks and tobacco in every form, while a member of the school.

Pupils from other schools must present certificates of honorable dismissal.

Applications for admission should be made at least a month before the beginning of a school year.

Pupils should enter the first day of a school year that they may be immediately classified, and thus lose no time. Students in regular classes lose their membership when absent any part of the year. Those pursuing a regular course are held amenable to the authority of the school during vacation, as well as during term time.

Those who have not a fixed purpose to improve their time, and an earnest desire to fit themselves for usefulness, should not seek admission, as the presence of such is not tolerated.

Student Aid.

Several Students have been aided during past years by the Peabody Fund and contributions from the friends of popular education. It is expected that this help will be continued.

The only *permanent* fund is the "Plainfield Scholarship" of three hundred dollars.

Persons should not come to the school hoping to receive aid until they have applied for it, and received a favorable answer. Those applying should state their pecuniary circumstances, their advancement in their studies, and, as far as possible, what pursuit they intend to follow.

It is expected that those who are aided will, when able, return the amount to aid others.

Music.

Instruction is given in both Vocal and Instrumental Music.

Graves Library.

By the liberality of the late R. R. Graves, Esq., of New York, and a few other friends, the library now contains nearly four thousand volumes. Mr. Graves has also given a permanent endowment of five thousand dollars, which secures its steady growth.

In connection with the Library is a Reading Room, well supplied with the leading papers and periodicals of the country, and to both the students have free access.

Apparatus.

A good beginning has been made in procuring Philosophical Apparatus. A complete set of Surveyor's Instruments has been procured.

Additions will be made from time to time.

Teaching.

Nearly all of those who are sufficiently advanced in scholarship aid themselves by teaching. The demand for teachers is usually in excess of the supply.

County Superintendents of Schools, and others desiring teachers from this Institution, will find it for their interest to arrange their schools, if possible, so as to include its summer vacation, viz., the months of July, August, and September. Communications from all such will be promptly attended to.

Students of this Institution, desiring to teach, will be furnished with certificates of membership and standing. As a means of protection from imposition, applicants for schools claiming to be from the Atlanta University should be required to exhibit such certificates.

Design.

It is expected that a majority of the students will engage in teaching, and instruction in all departments is adapted to that end. Earnest efforts are made to induce young men to prepare for the ministry.

The Institution stands on the broadest possible platform, and while intended to be thoroughly Christian, is in no respect sectarian. It offers its advantages to all of either sex, without regard to sect, race, color, or nationality.

It is desired to make the school, as far as possible, a *home* for those who attend. Not only their intellectual, but also their social, moral and religious culture, receive careful attention.

Government.

Discipline is administered with firmness and impartiality, and aims to induce a high moral sentiment which shall be in itself a powerful governing force in the school.

Suspension from school is resorted to when other means of correction fail.

When students are exposing themselves to permanent harm, it is expected that high-minded individuals will be governed by the dictates of conscience and common sense, rather than by any false sense of honor, in regard to disclosing the facts to the proper authority.

Wants.

The school being without endowments, is dependent upon the American Missionary Association for all support not derived from other sources.

There is a pressing and immediate need of an addition to the Ladies' Hall.

Other needs are such as all young Colleges have—building, endowments, scholarships, reference books, maps, apparatus, &c.

It is hoped that the time is not far distant when funds will flow into the treasury of the Institution as freely as they do into those of colleges in other parts of the country.

Expenses.

Tuition and board, including furnished rooms, fuel, lights, and washing,	per month,	\$12.00
Tuition for day pupils,	“ “	2.00
Instruction in Instrumental Music,	“ “	2.00
Use of Instrument one hour a day,	“ “	1.00

All payments must be made in advance on the first day of each month.

All pupils are required to work for the Institution at least one hour a day. This requirement makes the above low charges possible.

Remittances in payment of bills should be made by money-orders, drafts, in registered letters, or by express.

Make money-orders and drafts payable, during 1877-8, to E. A. Ware, and address all moneys to him. Receipts will be promptly returned.

Miscellaneous.

Each pupil should bring a Bible. It is needed for private reading, for the Sunday School, and for the weekly Bible lesson.

It is well to bring the text books formerly used.

All should be provided with *warm* clothing.

Young ladies should have rubbers and waterproofs.

Economy and good taste demand plain and simple clothing. Parents are urged to co-operate with teachers in seeing that none other is worn. No extra dress is required for the close of school.

Letters should be directed to Atlanta University, Atlanta, Ga.

Experience has taught that much evil comes from pupils receiving food from home. They are, therefore, not allowed to receive it. *Friends will please not send it.*

Students who do not board at their homes are not allowed to board out of the Institution, except by special permission.

Boarders are expected to furnish their own towels.

Keeping or using fire arms on the premises is forbidden.

During term-time students shall not, without permission, actively participate in any political or mass meeting.

History.

In October, 1867, a Board of Trustees was formed, and a charter obtained. Money was secured and a site of about fifty acres, on high ground, in the western part of the city, was purchased. In June, 1869, the corner-stone of the first building was laid. During the summer the building was erected, and in October was occupied by the school. It is a plain, four-storied, brick building, containing sleeping-rooms for about forty pupils, and also a parlor, dining-room, kitchen, &c. It was designed for a girls' dormitory, but during the first year, furnished all accommodations, both school and boarding, for the entire school. It was much crowded, and the inconvenience of the arrangement was very great. In August of 1870, another building of the same style, but larger, containing sleeping-rooms for about sixty boys, besides temporary school-rooms, was completed. In the summer of 1871 this building was enlarged by a wing, providing rooms for about forty pupils, and other school-rooms. This entire building is now heated by steam. The

trustees hold about sixty acres of land and the above described buildings. It is hoped that the immediate future will see an addition to the Ladies' Hall, and a central building containing chapel, library, laboratory, recitation, and lecture-rooms.

The Legislature of Georgia, in 1870, appropriated to this school \$8,000. The same amount was received in 1871 and in 1873. In 1874 a bill was almost unanimously passed making an annual appropriation of \$8,000. This bill was entitled "An act equitably to adjust the claims of the colored people to a share of the Agricultural Land Script." It made the appropriation on condition that the Board of Visitors of the University of Georgia should also visit this school; that the money should not be paid by the Governor till a commission of three members of the Faculty of the University of Georgia had approved the plan of the Trustees for the expenditure of the money, and that the school should educate free of charge for tuition, one pupil for every member of the House of Representatives, to be nominated by the members. Although a vigorous effort has been made for the past three years to repeal this bill, it is still in force.

Last year there were thirteen graduates, including six from the regular College Course.

The graduates, and others who have left before finishing their course, to the number of about one hundred, are engaged in teaching during a part or all of the year. Besides these, during the three months of the last summer vacation, one hundred and fifteen members of the school were also teaching. It is estimated that nearly eleven thousand people were taught, for a longer or shorter time, last year, by those connected with this institution

Normal Course.

This course consists of the ordinary Grammar-School branches and the studies of the first two years of the Higher Normal Course.

No examination for admission is required, but pupils will be classed according to their attainments.

This course is formed to meet the immediate demand for teachers throughout the State. A certificate of graduation will be given to those who complete this course.

Rhetorical exercises and weekly Bible lessons are required throughout all the course.

GENERAL INFORMATION.

Membership.

For membership in the Institution a person must have a good moral character, and must sign a pledge to abstain from the use of all intoxicating drinks and tobacco in every form, while a member of the school.

Pupils from other schools must present certificates of honorable dismissal.

Applications for admission should be made at least a month before the beginning of a school year.

Pupils should enter the first day of a school year that they may be immediately classified, and thus lose no time. Students in regular classes lose their membership when absent any part of the year. Those pursuing a regular course are held amenable to the authority of the school during vacation, as well as during term time.

Those who have not a fixed purpose to improve their time, and an earnest desire to fit themselves for usefulness, should not seek admission, as the presence of such is not tolerated.

Student Aid.

Several Students have been aided during past years by the Peabody Fund and contributions from the friends of popular education. It is expected that this help will be continued.

The only *permanent* fund is the "Plainfield Scholarship" of three hundred dollars.

Persons should not come to school hoping to receive aid until they have applied for it, and received a favorable answer. Those applying should state their pecuniary circumstances, their advancement in their studies, and, as far as possible, what pursuit they intend to follow.

It is expected that those who are aided will, when able, return the amount to aid others.

Music.

Facilities for instruction in both Vocal and Instrumental Music are ample. The Elements of Vocal Music are taught from Dr. Mason's Music Charts, without extra charge.

For practice in Instrumental Music, there are four organs and two pianos. (See expenses.)

Graves Library.

By the liberality of the late R. R. Graves, Esq., of New York, and a few other friends, the library now contains nearly four thousand volumes. Mr. Graves has also given a permanent endowment of five thousand dollars, which secures its steady growth.

In connection with the Library is a Reading Room, well supplied with the leading papers and periodicals of the country, and to both the students have free access.

Apparatus.

A good beginning has been made in procuring Philosophical Apparatus. Enough has been obtained for illustrating some of the simpler principles of Natural Science, and also instruments for Surveying and Engineering purposes.

Some money has been contributed toward the purchase of a Telescope, and it is hoped that before long enough will be raised to procure a serviceable instrument.

Teaching.

Nearly all of those who are sufficiently advanced in scholarship aid themselves by teaching. The demand for teachers is usually in excess of the supply.

County Superintendents of Schools, and others desiring teachers from this Institution, will find it for their interest to arrange their schools, if possible, so as to include its summer vacation, viz., the months of July, August, and September. Communications from all such officers will receive prompt attention.

Students of this Institution, desiring to teach, will be furnished with certificates of membership and standing. As a means of protection from imposition, applicants for schools claiming to be from the Atlanta University should be required to exhibit such certificates.

Design.

It is expected that a majority of the students will engage in teaching, and instruction in all departments is adapted to that end. Earnest efforts are made to induce young men to prepare for the ministry.

The Institution stands on the broadest possible platform, and while intended to be thoroughly Christian, is in no respect sectarian. It offers its advantages to all of either sex, without regard to sect, race, color, or nationality.

It is desired to make the school, as far as possible, a *home* for those who attend. Not only their intellectual, but also their social, moral and religious culture, receive careful attention.

Government.

Discipline is administered with firmness and impartiality, and aims to induce a high moral sentiment which shall be in itself a powerful governing force in the school.

Suspension from school is resorted to when other means of correction fail.

When students are exposing themselves to permanent harm, it is expected that high-minded individuals will be governed by the dictates of conscience and common-sense, rather than by any false sense of honor, in regard to disclosing the facts to the proper authority.

Wants.

The school being without endowments, is dependent upon the American Missionary Association for all support not derived from other sources.

There is a pressing and immediate need of an addition to the Ladies' Hall.

Other needs are such as all young Colleges have — building, endowments, scholarships, reference books, maps, apparatus, &c.

It is hoped that the time is not far distant when funds will flow into the treasury of the Institution as freely as they do into colleges in other parts of the country.

Expenses.

Tuition and board, including furnished rooms, fuel, lights, and washing,	
per month,	\$12.00
Tuition for day pupils, per month,	2.00
Instruction in Instrumental Music “ “	2.00
Use of Instrument one hour a day, “ “	1.00

All payments must be made in advance on the first day of each month.

All pupils are required to work for the Institution at least one hour a day. This requirement makes the above low charges possible.

Remittances in payment of bills should be made by money-orders, drafts, in registered letters, or by express.

Make money-orders and drafts payable, during 1878-9, to E. A. Ware, and address all moneys to him. Receipts will be promptly returned.

Miscellaneous.

Each pupil should bring a Bible. It is needed for private reading, for the Sunday School, and for the weekly Bible lesson.

It is well to bring the text books formerly used.

All should be provided with *warm* clothing.

Young ladies should have rubbers and waterproofs.

Economy and good taste demand plain and simple clothing. Parents are urged to co-operate with teachers in seeing that none other is worn. No extra dress is required for the close of school.

Letters should be directed to Atlanta University, Atlanta, Ga.

Experience has taught that much evil comes from pupils receiving food from home. They are, therefore, not allowed to receive it. *Friends will please not send it.*

Students who do not board at their homes are not allowed to board out of the Institution, except by special permission.

Boarders are expected to furnish their own towels.

Keeping or using fire arms on the premises is forbidden.

During term-time students shall not, without permission, actively participate in any political or mass meeting.

Students from a distance should arrange their journeys so as not to arrive on the Sabbath, as they will not be admitted on that day. When going away, they should apply for dismissal in season to arrive at home before the Sabbath.

Students are not allowed to make visits on the Sabbath, and their friends are earnestly requested not to call upon them on that day.

The Institution is the result of benevolent efforts, and that it will be decidedly religious in its influence, without being sectarian, is the reasonable expectation of its friends. Among the appropriate means for securing such results, the Sabbath, with its religious services, is the most important day. The excitement of visiting and meeting friends will prevent, in a great measure, the benefit that may be derived from a proper observance of the day.

History.

In October, 1867, a Board of Trustees was formed, and a charter obtained. Money was secured and a site of about fifty acres, on high ground, in the western part of the city, was purchased. In June, 1869, the corner-stone of the first building was laid. During the summer the building was erected, and in October was occupied by the school. It is a plain, four-storied, brick building, containing sleeping-rooms for about forty pupils, and also a parlor, dining-room, kitchen, &c. It was designed for a girls' dormitory, but during the first year, furnished all accommodations, both school and boarding, for the entire school. It was much crowded, and the inconvenience of the arrangement was very great. In August of 1870, another building of the same style, but larger, containing sleeping-rooms for about sixty boys, besides temporary school-rooms, was completed. In the summer of 1871 this building was enlarged by a wing, providing rooms for about forty pupils, and other school-rooms. This entire building is now heated by steam. The trustees hold about sixty acres of land and the above described buildings. It is hoped that the immediate future will see an addition to the Ladies' Hall, and a central building containing chapel, library, laboratory, recitation, and lecture-rooms.

The Legislature of Georgia, in 1870, appropriated to this school \$8,000. The same amount was received in 1871 and in 1873. In 1874 a bill was almost unanimously passed making an annual appropriation of \$8,000. This bill was entitled "An act equitably to adjust the claims of the colored people to a share of the Agricultural Land Scrip." It made the appropriation on condition that the Board of Visitors of the University of Georgia should also visit this school; that the money should not be paid by the Governor till a commission of three members of the Faculty of the University of Georgia had approved the plan of the Trustees for the expenditure of the money, and that the school should educate free of charge for tuition, one pupil for every member of the House of Representatives, to be nominated by the members.

Nearly all the graduates, and many others who have left before finishing their course, are engaged in teaching during a part or all of the year. Besides these during the three months of the last summer vacation, more than a hundred members of the school were also teaching. It is estimated that from ten to twelve thousand children were taught, for a longer or shorter time, last year, by those connected with this institution.

Report on Atlanta University.

ATHENS, July 10th, 1877.

Mr. J. W. Glenn, from the special committee charged with the duty of attending the annual examinations of the University of Atlanta, reported as follows:

Present, Mark Johnston, H. H. Jones, J. H. Dunham, C. M. Neal, H. L. Mitchell, and J. W. Glenn.

That the recitations before the Board were most flattering to the teachers and pupils. The results exhibited extraordinary skill and patience in the former, and remarkable docility on the part of the latter.

A strict construction of duty might, with this statement, discharge the Board, but presuming that the Governor and General Assembly wish the fullest information, by which they may decide whether the patronage of Georgia has been well bestowed on this institution, the board would further suggest that probably we have heretofore overlooked the vast influence which it may exert on our State.

They would call the attention of the General Assembly to the fact that it can, to a great extent, shape the public opinions of the colored race, and make them true and loyal citizens of Georgia, thereby increasing her dignity, power and influence, or it can turn all their prejudices and feelings against their native State, as the former scene of their slavery and the present home, as charged by our enemies, of their oppressors and natural enemies. Thus trained, they will be ready at the suggestion of our enemies to throw all their political influence and voting power against the true interests of our own section. No school in Georgia ever had such a field, and its social as well as political power may become immense. Those who seek instruction there control nearly one half of the votes of the Empire State of the South. They have just been emancipated, and are wholly unformed as citizens, and, as yet, almost ciphers in the problem of government—ciphers to be placed after any significant factor that happens to control the impulse, the moment. The Board noticed, too, that they were eminently “clay in the hands of the potter.”

Probably no pupils on earth yield so implicitly to the impress made by the teacher.

The pupils from that school will be the moulders of their race in the State, and the bias which they receive for or against our home institutions will be communicated to a vast body of new voters. It has passed into an axiom that the people of a Republic must be educated, since all questions of policy and power must be ultimately referred to them. We consider it no less axiomatic that such education should develop a strong patriotism and a distinctive love for home and “fatherland.” This race have naturally strong local attachments, but they evidently do not love the home institutions of Georgia as directed by the whites. Our State is a large patron of this institution, and she can be interested in it only so far as it sends out to her intelligent, moral and patriotic citizens. To accomplish this and furnish noble citizens from a race necessarily degraded by recent bondage,

as yet almost untaught, and with circumstances and influences wholly unfavorable, is a task as vast in proportions as it would be noble in purpose. Your Board had constantly in view these ends to be attained, and the difficulties in the way. They also found neatness and order in the school room, far in advance of what is usually found in the academies and colleges of the whites.

The pupils were exceedingly quiet and respectful, and showed an appreciation of the proprieties and a love for the harmonious and beautiful, which few, knowing the race, would have thought possible. Indeed, the Board are constrained to say that the mental training was very satisfactory. These pupils will *certainly* exert a tremendous influence on their race.

As to whether that influence will be for good or ill, is as yet more problematical. Heretofore, most of the surroundings of these people have tended to drag them away from us; to alienate their affections from the State and embitter them against her institutions. This has been most unfortunate for State and people, and it is highly important that their allegiance and love be secured to the home government.

Until this is done, they will always be indifferent and troublesome citizens. The carpet-baggers and others who exerted a bad influence, are now powerless, or nearly so; and if the pupils from this school be patriotic and true, the race may furnish the State many valuable citizens. Members of the Board thought that the animus of the pupils this year seemed much better.

Formerly, their feelings were clearly against us, almost wholly alienated—so much so, indeed, that the propriety of withdrawing the State aid and using it for a normal school taught by our own people has been discussed and pressed.

But the Board think *now* such a course would be unwise; as it would create dissatisfaction and further alienation; because they accepted this aid in lieu of their claim on the Government Land scrip.

They seem much attached to the school, and for the present they will take instruction from Northern teachers more readily and confidently than they would from us.

The Board suggest, however, that our authorities insist that these Northern teachers *do not* try to alienate them from old masters and homes, and from their native State; or even use such instruction or place around them such influences (by sectional books, etc.) as will have that tendency.

Probably the present teachers are not so careful in this respect as the interests of this people and of our State demand. The Board would further suggest that the graduates of the "Atlanta University" be encouraged, by all proper authorities, to engage in teaching their race, and in helping to make them good citizens.

All of which is most respectfully submitted.

J. W. GLENN.

On motion, the foregoing report was read before the whole Board of Visitors for the State University, adopted, and ordered to be transmitted to the Governor.

(Signed)

H. H. JONES,

Chairman Board of Visitors.

Normal Course.

This course consists of the ordinary Grammar-School branches and the studies of the first two years of the Higher Normal Course.

No examination for admission is required, but pupils will be classed according to their attainments.

This course is formed to meet the immediate demand for teachers throughout the State. A certificate of graduation will be given to those who complete this course.

Written examinations are required in the studies of all the courses, except the Normal, at the close of the Fall and Winter Terms, and oral examinations in the studies of all the courses, annually, during the three days next preceding Commencement; also written examinations are required frequently in Common English branches from all students above the Normal Course.

In addition to the prescribed studies, young women in the Higher Normal Course are taught "Household Science," embracing Plain Sewing, Cookery, Nursing the sick, etc.

This instruction is given both by familiar lectures and by practice in those arts. Specimens of their sewing are to be preserved for examination.

Rhetorical exercises and weekly Bible lessons are required throughout all the courses.

GENERAL INFORMATION.

Membership.

For membership in the Institution a person must have a good moral character, and must sign a pledge to abstain from the use of all intoxicating drinks and tobacco in every form, while a member of the school.

Pupils from other schools must present certificates of honorable dismissal.

Applications for admission should be made at least a month before the beginning of a school year.

Pupils should enter the first day of a school year that they may be immediately classified, and thus lose no time. Students lose their membership when absent one month. During vacation, as well as during term time, students are held amenable to the authority of the school.

Those who have not a fixed purpose to improve their time, and an earnest desire to fit themselves for usefulness, should not seek admission, as the presence of such is not tolerated.

The Institution is not sectarian in its religious instruction or influence, while aiming to be thoroughly Christian. It is open to all students of either sex.

It is desired to make the school, as far as possible, a *home* for those who attend. Not only their intellectual, but also their social, moral and religious culture, receive careful attention.

Student Aid.

Several students have been aided during past years by the Peabody Fund and contributions from the friends of popular education. It is expected that this help will be continued.

The only *permanent* fund is the "Plainfield Scholarship" of three hundred dollars.

Persons should not come expecting to receive aid until they have applied for it, and received a favorable answer. Those applying should state their pecuniary circumstances, their advancement in their studies, and, as far as possible, what pursuit they intend to follow.

It is expected that those who are aided will, when able, return the amount to aid others.

Music.

Facilities for instruction in both Vocal and Instrumental Music are ample. The Elements of Vocal Music are taught from Dr. Mason's Music Charts, without extra charge.

For practice in Instrumental Music, there are four organs and two pianos. (See expenses.)

Graves Library.

By the liberality of the late R. R. Graves, Esq., of New York, and a few other friends, the library now contains nearly four thousand volumes. Mr. Graves has also given a permanent endowment of five thousand dollars, which secures its steady growth.

In connection with the Library is a Reading Room, well supplied with the leading papers and periodicals of the country, and to both the students have free access.

Apparatus.

A good beginning has been made in procuring Philosophical Apparatus. Enough has been obtained for illustrating some of the simpler principles of Natural Science, and also instruments for Surveying and Engineering purposes.

Some money has been contributed toward the purchase of a Telescope, and it is hoped that before long enough will be raised to procure a serviceable instrument.

Teaching.

It is expected that a majority of the students will engage in teaching, and instruction in all departments is adapted to that end. Earnest efforts are made to induce young men to prepare for the ministry.

Nearly all of those who are sufficiently advanced in scholarship aid themselves by teaching. The demand for teachers is usually in excess of the supply.

County Superintendents of Schools, and others desiring teachers from this Institution, will find it for their interest to arrange their schools, if possible, so as to include its summer vacation, viz., the months of July, August and September. Communications from all such officers will receive prompt attention.

Students of this Institution, desiring to teach, will be furnished certificates of membership and standing. As a means of protection against imposition, applicants for schools claiming to be from Atlanta University should be required to exhibit such certificates.

Government.

Discipline is administered with firmness and impartiality, and aims to induce a high moral sentiment which shall be in itself a powerful governing force in the school.

Suspension from school is resorted to when other means of correction fail.

When students are exposing themselves to permanent harm, it is expected that high-minded individuals will be governed by the dictates of conscience and common-sense, rather than by any false sense of honor, in regard to disclosing the facts to the proper authority.

Wants.

The school being without endowments, is dependent upon the American Missionary Association for all support not derived from other sources.

Our needs are such as all young Colleges have—endowments, scholarships, reference books, maps, apparatus, etc.

It is hoped that the time is not far distant when funds will flow into the treasury of the Institution as freely as they do into colleges in other parts of the country.

Expenses.

Board, including furnished rooms, fuel, lights, and washing, per month,	\$10.00
Tuition, except in Normal Course, per month,	2.00
Tuition in Normal Course, " "	1.00
Instruction in Instrumental Music, " "	1.00
Use of Instrument one hour a day, " "	1.00

All payments must be made in advance on the first day of each month.

All pupils are required to work for the Institution at least one hour a day. This requirement makes the above low charges possible.

Remittances in payment of bills should be made by money-orders, drafts, in registered letters, or by express.

Make money-orders and drafts payable, during 1879-80 to T. N. Chase, and address all moneys to him. Receipts will be promptly returned.

Miscellaneous.

Each pupil should bring a Bible. It is needed for private reading, for the Sunday-school, and for the weekly Bible lesson.

It is well to bring the text books formerly used.

All should be provided with *warm* clothing.

Young women should have rubbers and waterproofs.

Economy and good taste demand plain and simple clothing. Parents are urged to co-operate with teachers in seeing that none other is worn. No extra dress is required for the close of school.

Letters should be directed to Atlanta University, Atlanta, Ga.

Experience has taught that much evil comes from pupils receiving food from home. They are, therefore, not allowed to receive it. *Friends will please not send it.*

Students who do not board at their homes are not allowed to board out of the Institution, except by special permission.

Boarders are expected to furnish their own towels.

Keeping or using fire arms on the premises is forbidden.

During term-time students shall not, without permission, actively participate in any political or mass meeting.

Students from a distance should arrange their journeys so as not to arrive on the Sabbath, as they will not be admitted on that day. When going away, they should apply for dismissal in season to arrive at home before the Sabbath.

Students are not allowed to make visits on the Sabbath, and their friends are earnestly requested not to call upon them on that day.

The Institution is the result of benevolent efforts, and that it be decidedly religious in its influence, without being sectarian, is the reasonable expectation of its friends. Among the appropriate means for securing such results, the Sabbath, with its religious services, is the most important. The excitement of visiting friends prevents, in a great measure, the benefit that may be derived from a proper observance of the day,

History.

In October, 1867, a Board of Trustees was formed, and a charter obtained. Money was secured and a site of about fifty acres, on high ground, in the western part of the city, was purchased. In June, 1869, the corner-stone of the first building was laid. During the summer the building was erected, and in October was occupied by the school. It is a plain, four-storied, brick building, containing sleeping-rooms for about forty pupils, and also a parlor, dining-room, kitchen, etc. It was designed for a girls' dormitory, but during the first year, furnished all accommodations, both school and boarding, for the entire school. It was much crowded, and the inconvenience of the arrangement was very great. In August of 1870, another building of the same style, but larger, containing sleeping-rooms for about sixty boys, besides temporary school-rooms, was completed. In the summer of 1871 this building was enlarged by a wing, providing rooms for about forty pupils, and other school-rooms. This entire building is now heated by steam. The trustees hold about sixty acres of land and the above described buildings. There has been a pressing need of an addition to the North Hall, and a central building containing chapel, library, laboratory, recitation, and lecture rooms. It is expected that the gift of *fifty thousand dollars* from the "Stone Estate," Malden, Mass., will soon furnish these buildings.

The Legislature of Georgia, in 1870, appropriated to this school \$8,000. The same amount was received in 1871 and in 1873. In 1874 a bill was almost unanimously passed making an annual appropriation of \$8,000. This bill was entitled "An act equitably to adjust the claims of the colored people to a share of the Agricultural Land Scrip." It made the appropriation on condition that the Board of Visitors of the University of Georgia should also visit this school; that the money should not be paid by the Governor till a commission of three members of the Faculty of the University of Georgia had approved the plan of the Trustees for the expenditure of the money, and that the school should educate, free of charge for tuition, one pupil for every member of the House of Representatives, to be nominated by the members.

Nearly all the graduates, and many others who have left before finishing their course, are engaged in teaching during a part or all of the year. Besides these, during the three months of the summer vacation a large number of students engage in teaching, and it is estimated that over ten thousand children in Georgia are taught, annually, by those who have been connected with this institution.

During the year the attendance of students has been larger and more constant than any previous year. They have come from *ten* different States, and those from Georgia have represented *forty-seven* counties.

Report of the State Board of Examiners.

To the Board of Visitors :

GENTLEMEN—Your committee, charged with the duty of reporting upon the annual examinations of the University of Atlanta, have the honor to report as follows :

For the first time since the establishment of the University, the examinations were attended by the entire Board of Visitors; thus showing the increased interest taken by them in this very important educational experiment. The teachers seem thoroughly competent, each in his or her sphere, to give all the instruction called for by the prescribed course of study, and there can be no doubt of the patient zeal and energy with which they perform their duties. This is evidenced by the progress of the pupils; by the care with which the students are made to explain the texts of the books from which they recite; by the clearness of such explanations; by the excellent behavior of the scholars, and the remarkable neatness of the school rooms—the desks, chairs, walls and floors being free from ink or other stains, and pencil or knife marks.

The recitations will average fair. Some were excellent, others not so good. But your committee were impressed with the fact that the colored race, whether of pure or mixed blood, are capable of receiving the education usually given at such institutions. Whether they will be able to build, and build usefully, upon the foundation thus laid, remains to be seen. If they cannot or do not do it, it will not be the fault of their instructors; and your committee cannot refrain from commending the course of Mr. President Ware in impressing upon the graduates the fact that the information which they had received was not an education, but only the knowledge of what an education was, and that the real work of education began where their college course ended.

Referring to the very able report of your committee of last year, your present committee desire to express their gratification that it has apparently been heeded by those in immediate control of the University. The objectional sectional books have disappeared from the library, and your committee are assured, not only that "those Northern teachers *do not* try to alienate them (the pupils) from old masters and homes, and from their native State," but that every effort is used to counteract any tendency towards such alienation.

Among the text books is one which your committee thinks teaches incorrect theories of constitutional law, and they have pointed out the supposed defects to Mr. President Ware, and believe that the matter will receive prompt attention, and the evil complained of be done away with.

It is of vast importance that these pupils should receive correct information as to the true nature of United States, and State governments, and their relations to each other. Politics and political instruction should not enter into the course of study; but certain broad principles of constitutional gov-

ernment should be taught, and great care should be taken that such principles be taught from the standpoint of constitutional law, not political opinion; and questions upon which political parties are divided should be either entirely ignored or the two constructions stated without comment.

Your committee therefore recommend that the State Commissioners of the University be instructed to examine the text-books used, with power to reject such as may prove objectionable; and it is believed that the faculty will heartily approve such a plan, as your committee feels satisfied that such books (if there be such now in use) have been adopted with a perfect unconsciousness of any objectionable feature. Your committee so think because free and candid conversations with the President and various members of the Faculty have convinced them that they (the Faculty) are animated by a sincere desire to elevate the colored race upon its own merits, are free from any leveling tendencies, and recognize the fact that their pupils' true interests are to live in harmony and accord with their late owners, now, as in the past, their best friends.

It will be gratifying to the State authorities, and to the people at large, to learn that strict attention is paid to the moral culture of the students, and that, so far, every graduate has been a professor of some protestant faith.

Your committee cannot close their report without expressing the gratification they experienced in attending the commencement exercises. Special mention would be inappropriate. Suffice it to say that some of the orations and essays would have reflected no discredit on graduates of more pretentious institutions.

Respectfully submitted,

WM. D. HARDEN,

Chairman Special Committee.

J. H. DUNHAM.

MARK W. JOHNSTON.

On motion, the report of the Committee of the Board on the Atlanta University was unanimously adopted, and ordered to be sent to the Governor.

Normal Course.

This course consists of the ordinary Grammar-School branches and the studies of the first two years of the Higher Normal Course.

No examination for admission is required, but pupils will be classed according to their attainments.

This course is formed to meet the immediate demand for teachers throughout the State. A certificate of graduation will be given to those who complete this course.

Written examinations are required in the studies of all the courses, except the Normal, at the close of the Fall and Winter Terms, and oral examinations in the studies of all the courses, annually, during the three days next preceding Commencement; also written examinations are required frequently in Common English branches from all students above the Normal Course.

In addition to the prescribed studies, young women in the Higher Normal Course are taught "Household Science," embracing Plain Sewing, Cookery, Nursing the sick, etc.

This instruction is given both by familiar lectures and by practice in those arts. Specimens of their sewing are to be preserved for examination.

Rhetorical exercises and weekly Bible lessons are required throughout all the courses.

General Information.

Membership.

For membership in the Institution a person must have a good moral character, and must sign a pledge to abstain from the use of all intoxicating drinks and tobacco in every form, while a member of the school.

Pupils from other schools must present certificates of honorable dismissal.

Applications for admission should be made at least a month before the beginning of the school year.

Pupils should enter the first day of a school year that they may be immediately classified, and thus lose no time. Students lose their membership when absent one month. During vacation, as well as during term time, students are held amenable to the authority of the school.

Those who have not a fixed purpose to improve their time, and an earnest desire to fit themselves for usefulness, should not seek admission, as the presence of such is not tolerated.

The Institution is not sectarian in its religious instruction or influence, while aiming to be thoroughly Christian. It is open to all students of either sex.

It is desired to make the school, as far as possible, a *home* for those who attend. Not only their intellectual, but also their social, moral and religious culture, receive careful attention.

Student Aid.

Several students have been aided during past years by the Peabody Fund and contributions from the friends of popular education. It is expected this help will be continued.

The only *permanent* fund is the "Plainfield Scholarship" of three hundred dollars.

Persons should not come expecting to receive aid until they have applied for it, and received a favorable answer. Those applying should state their pecuniary circumstances, their advancement in their studies, and, as far as possible, what pursuit they intend to follow.

It is expected that those who are aided will, when able, return the amount to aid others.

Music.

Facilities for instruction in both Vocal and Instrumental Music are ample. The elements of Vocal Music are taught from Dr. Mason's Music Charts, without extra charge.

For practice in Instrumental Music, there are four organs and two pianos. (See expenses)

Graves Library.

By the liberality of the late R. R. Graves, Esq., of New York, and a few other friends, the library now contains nearly five thousand volumes. Mr. Graves has also given a permanent endowment of five thousand dollars, which secures its steady growth.

In connection with the Library is a Reading Room, well supplied with the leading papers and periodicals of the country, and to both the students have free access.

Apparatus.

A good beginning has been made in procuring Philosophical Apparatus. Enough has been obtained for illustrating some of the simpler principles of Natural Science, and also instruments for Surveying and Engineering purposes.

Some money has been contributed toward the purchase of a Telescope, and it is hoped that before long enough will be raised to procure a serviceable instrument.

Teaching.

It is expected that a majority of the students will engage in teaching, and instruction in all departments is adapted to that end. Earnest efforts are made to induce young men to prepare for the ministry.

Nearly all of those who are sufficiently advanced in scholarship aid themselves by teaching. The demand for teachers is usually in excess of the supply.

County Superintendents of Schools, and others desiring teachers from this Institution, will find it for their interest to arrange their schools, if possible, so as to include its summer vacation, viz., the months of July, August and September. Communications from all such officers will receive prompt attention.

Students of this Institution, desiring to teach, will be furnished certificates of membership and standing. As a means of protection against imposition, applicants for schools claiming to be from Atlanta University should be required to exhibit such certificates.

Government.

Discipline is administered with firmness and impartiality, and aims to induce a high moral sentiment which shall be in itself a powerful governing force in the school.

Suspension from school is resorted to when other means of correction fail.

When students are exposing themselves to permanent harm, it is expected that high-minded individuals will be governed by the dictates of conscience and common-sense, rather than by any false sense of honor, in regard to disclosing the facts to the proper authority.

Wants.

The school being without endowments, is dependent upon the American Missionary Association for all support not derived from other sources.

Our needs are such as young Colleges have—endowments, scholarships, reference books, maps, apparatus, etc.

It is hoped that the time is not far distant when funds will flow into the treasury of the Institution as freely as they do into colleges in other parts of the country.

Expenses.

Board, including furnished rooms, fuel, lights, and washing per month	\$ 8 00
Tuition, in College Course, per month,	2 00
Tuition, in all other Courses, “ “	1 00
Instruction in Instrumental Music, “ “	1 00
Use of Instrument one hour a day, “ “	1 00

All payments must be made in advance on the first day of each month.

All pupils are required to work for the Institution at least one hour a day. This requirement makes the above low charges possible.

Remittances in payment of bills should be made by money-orders, drafts, in registered letters, or by express.

Make money-orders and drafts payable, puring 1880-81 to E. A. Ware, and address all moneys to him. Receipts will be promptly returned.

Miscellaneous.

Each pupil should bring a Bible. It is needed for private reading, for the Sunday-school, and for the weekly Bible lesson.

It is well to bring the text books formerly used.

All should be provided with *warm* clothing.

Young women should have rubbers and waterproofs.

Economy and good taste demand plain and simple clothing. Parents are urged to co-operate with teachers in seeing that none other is worn. No extra dress is required for the close of school.

Letters should be directed to Atlanta University, Atlanta, Ga.

Experience has taught that much evil comes from pupils receiving food from home. They are, therefore, not allowed to receive it. *Friends will please not send it.*

Students who do not board at their homes are not allowed to board out of the Institution, except by special permission.

Boarders are expected to furnish their own towels.

Keeping or using fire arms on the premises is forbidden.

During term-time students shall not, without permission, actively participate in any political or mass meeting.

Students from a distance should arrange their journeys so as not to arrive on the Sabbath, as they will not be admitted on that day. When going away, they should apply for dismissal in season to arrive at home before the Sabbath.

Students are not allowed to make visits on the Sabbath, and their friends are earnestly requested not to call upon them on that day.

The Institution is the result of benevolent efforts, and that it be decidedly religious in its influence, without being sectarian, is the reasonable expectation of its friends. Among the appropriate means for securing such results, the Sabbath, with its religious services, is the most important. The excitement of visiting friends prevents, in a great measure, the benefit that may be derived from a proper observance of the day.

History.

In October, 1867, a Board of Trustees was formed, and a charter obtained. Money was secured and a site of about fifty acres, on high ground, in the western part of the city, was purchased. In June, 1869, the cornerstone of the first building was laid. During the summer the building was erected, and in October was occupied by the school. It is a plain, four-storied, brick building, containing sleeping-rooms for about forty pupils, and also a parlor, dining-room, kitchen, etc. It was designed for a girls' dormitory, but during the first year, furnished all accommodations, both school and boarding, for the entire school. It was much crowded, and the inconvenience of the arrangement was very great. In August of 1870, another building of the same style, but larger, containing sleeping-rooms for about sixty boys, besides temporary sleeping-rooms, was completed. In the summer of 1871 this building was enlarged by a wing, providing rooms for about forty pupils, and other school-rooms. This entire building is now heated by steam. The trustees hold about sixty acres of land and the above described buildings. There has been a pressing need of an addition to the North Hall, and a central building containing chapel, library, laboratory, recitation, and lecture rooms. It is expected that the gift of *fifty thousand dollars* from the "Stone Estate," Malden, Mass., will soon furnish these buildings. A donation of \$10,000, from the estate of R. R. Graves, the founder of the "Graves Library," has been received during the year.

The Legislature of Georgia, in 1870, appropriated to this school \$8,000. The same amount was received in 1871 and in 1873. In 1874 a bill was almost unanimously passed making an annual appropriation of \$8,000. This bill was entitled "An act equitably to adjust the claims of the colored people to a share of the Agricultural Land Scrip." It made the appropriation on condition that the Board of Visitors of the University of Georgia should also visit this school; that the money should not be paid by the Governor till a commission of three members of the Faculty of the University of Georgia had approved the plan of the Trustees for the expenditure of the money, and that the school should educate, free of charge for tuition, one pupil for every member of the House of Representatives, to be nominated by the members. By the recommendation of Hon. G. J. Orr, State School Commissioner, the trustees of the Peabody Fund appropriated, for the present year, \$1,000 for Normal Scholarships.

Nearly all the graduates, and many others who have left before finishing their course, are engaged in teaching during a part or all of the year. Besides these, during the three months of the summer vacation a large number of students engage in teaching, and it is estimated that over ten thousand children in Georgia are taught, annually, by those who have been connected with this institution.

Report of the State Board of Examiners.

To the Board of Visitors:

GENTLEMEN—The undersigned, your appointees, herewith submit the following report upon the final examination of the Atlanta University, for the school year just closed.

The Board attended these examinations in an almost entire body. They were promptly and courteously met by President Ware and his associates, and the examinations proceeded with systematic regularity. The exercises were designated by neatly printed programmes, with the time and place of recitation distinctly set forth.

The examinations were fairly conducted and disclosed the fact that the most advanced methods of teaching were employed. These methods were mainly topical, supplemented by appropriate questions, which evinced that the students had an intelligent comprehension of the subjects under consideration. We were especially impressed by the evidences of patient, systematic, untiring training on the part of the teachers, so well adapted to the colored, or any race, and by the progressive manner in which a subject was developed. All branches taught, passed in review before us, and whether the immediate subject was reading, grammar, history, mathematics, the classics, or other branches, the means employed and the results attained were entirely satisfactory. The examinations were entirely oral and the decorum and order maintained were of a high character.

The cleanliness of the recitation rooms, the preservation of school property and the gradual improvement of the grounds were marked.

The final exercises at Friendship church were very creditable to the institution. The subjects of the speeches and essays were appropriate, without political bearing, and they were delivered and read in a becoming manner.

Comparing the examinations with preceding ones, we are satisfied that the University is steadily on the up grade, and that it is becoming a center of great interest among the colored people.

The religious training of the pupils appeared to be excellent.

The Normal feature of the institution we regard with especial interest. In no way can education be so rapidly extended, or its improved methods be effectually multiplied, as by the special training of teachers. This we believe to be the great educational want of our State.

We have one suggestion to make, viz.: as the oral recitation has been now so satisfactorily developed, would it not be beneficial to introduce some written examination work in the higher classes, as affording a better comparative test, and as advancing the examinations fully up to the modern standard?

In closing, your committee would state that they were much gratified to learn through the President that the future of the institution is very flattering. Two bequests amounting to \$60,000 have lately been made to

it, and it is proposed at an early day to erect a new building on an improved plan, between the present edifices, to enlarge the dormitories for girls and to provide a dining-room capable of seating 300 persons.

It is your committee's opinion, based upon the foregoing, that the State has acted wisely in her appropriation to the Atlanta University, and that a continuance of it is to her best interests.

Respectfully submitted.

Chairman Special Committee.

On motion, the above report was ordered to be submitted to the Governor.

TEACHING—Methods and Practice.

Grammar School.

(Formerly Normal Course.)

This department provides a course of study in Reading, Spelling, Grammar, Geography with Map Drawing, United States History, Elements of Geometry, Botany and Physiology, Writing, Inventive and Free Hand Drawing, Vocal Music and Gymnastics.

Weekly Bible Lessons are required throughout the course.

Written examinations are required in the studies of all the courses, except the Grammar School, at the close of the Fall and Winter Terms, and oral examinations in the studies of all the courses, annually, during the three days next preceding Commencement; also written examinations are required frequently in Common English branches from all students above the Grammar School Course.

In addition to the prescribed studies, young women in the Normal Course are taught "Household Science," embracing Plain Sewing, Cookery, Nursing the sick, etc.

This instruction is given both by familiar lectures and by practice in those arts. Specimens of their sewing are to be preserved for examination.

General Information

Membership.

For membership in the Institution a person must have a good moral character, and must sign a pledge to abstain from the use of all intoxicating drinks and tobacco in every form, while a member of the school.

Pupils from other schools must present certificates of honorable dismissal.

Applications for admission should be made at least a month before the beginning of the school year.

Pupils should enter the first day of a school year that they may be immediately classified, and thus lose no time. Students lose their membership when absent one month. During vacation, as well as during term time, students are held amenable to the authority of the school.

Those who have not a fixed purpose to improve their time, and an earnest desire to fit themselves for usefulness, should not seek admission, as the presence of such is not tolerated.

The Institution is not sectarian in its religious instruction or influence, while aiming to be thoroughly Christian. It is open to all students of either sex.

It is desired to make the school, as far as possible, a *home* for those who attend. Not only their intellectual, but also their social, moral and religious culture, receive careful attention.

Student Aid.

Several students have been aided during past years by the Peabody Fund and contributions from the friends of popular education. It is expected this help will be continued.

The only *permanent* fund is the "Plainfield Scholarship" of three hundred dollars.

Persons should not come expecting to receive aid until they have applied for it, and received a favorable answer. Those applying should state their pecuniary circumstances, their advancement in their studies, and, as far as possible, what pursuit they intend to follow.

It is expected that those who are aided will, when able, return the amount to aid others.

Music.

Facilities for instruction in both Vocal and Instrumental Music are ample. The elements of Vocal Music are taught from Dr. Mason's Music Charts, without extra charge.

For practice in Instrumental Music, there are four organs and two pianos. (See expenses.)

Graves Library.

By the liberality of the late R. R. Graves, Esq., of New York, and a few other friends, the library now contains nearly five thousand volumes. Mr. Graves has also given a permanent endowment of five thousand dollars, which secures its steady growth.

In connection with the Library is a Reading Room, well supplied with the leading papers and periodicals of the country, and to both the students have free access.

Apparatus.

A good beginning has been made in procuring Philosophical Apparatus. Enough has been obtained for illustrating some of the simpler principles of Natural Science, and also instruments for Surveying and Engineering purposes.

Some money has been contributed toward the purchase of a Telescope, and it is hoped that before long enough will be raised to procure a serviceable instrument.

Teaching.

It is expected that a majority of the students will engage in teaching, and instruction in all departments is adapted to that end. Earnest efforts are made to induce young men to prepare for the ministry.

Nearly all of those who are sufficiently advanced in scholarship aid themselves by teaching. The demand for teachers is usually in excess of the supply.

County Superintendents of Schools, and others desiring teachers from this Institution, will find it for their interest to arrange their schools, if possible, so as to include its summer vacation, viz., the months of July,

August and September. Communications from all such officers will receive prompt attention.

Students of this Institution, desiring to teach, will be furnished certificates of membership and standing. As a means of protection against imposition, applicants for schools claiming to be from Atlanta University should be required to exhibit such certificates.

Government.

Discipline is administered with firmness and impartiality, and aims to induce a high moral sentiment which shall be in itself a powerful governing force in the school.

Suspension from school is resorted to when other means of correction fail.

When students are exposing themselves to permanent harm, it is expected that high-minded individuals will be governed by the dictates of conscience and common-sense, rather than by any false sense of honor, in regard to disclosing the facts to the proper authority.

Wants.

The school being without endowments, is dependent upon the American Missionary Association for all support not derived from other sources.

Our needs are such as young Colleges have—endowments, scholarships, reference books, maps, apparatus, etc.

It is hoped that the time is not far distant when funds will flow into the treasury of the Institution as freely as they do into colleges in other parts of the country.

Expenses.

Board, including furnished rooms, fuel, lights, and washing, per month	\$8 00
Tuition, in College Course, per month,	2 00
Tuition, in all other Courses, “ “	1 00
Instruction in Instrumental Music, “ “	1 00
Use of Instrument one hour per day, “ “	1 00

All payments must be made in advance on the first day of each month.

All pupils are required to work for the Institution at least one hour a day. This requirement makes the above low charges possible.

Remittances in payment of bills should be made by money-orders, drafts, in registered letters, or by express.

Make money-orders and drafts payable, during 1881-82 to H. Bumstead, and address all moneys to him. Receipts will be promptly returned.

Miscellaneous.

Each pupil should bring a Bible. It is needed for private reading, for the Sunday-school, and for the weekly Bible lesson.

It is well to bring the text books formerly used.

All should be provided with *warm* clothing.

Young women should have rubbers and waterproofs.

Economy and good taste demand plain and simple clothing. Parents are urged to co-operate with teachers in seeing that none other is worn. No extra dress is required for the close of school.

Letters should be directed to Atlanta University, Atlanta, Ga.

Experience has taught that much evil comes from pupils receiving food from home. They are, therefore, not allowed to receive it. *Friends will please not send it.*

Students who do not board at their homes are not allowed to board out of the Institution, except by special permission.

Boarders are expected to furnish their own towels.

Keeping or using fire arms on the premises is forbidden.

During term-time students shall not, without permission, actively participate in any political or mass meeting.

Students from a distance should arrange their journeys so as not to arrive on the Sabbath, as they will not be admitted on that day. When going away, they should apply for dismissal in season to arrive at home before the Sabbath.

Students are not allowed to make visits on the Sabbath, and their friends are earnestly requested not to call upon them on that day.

The Institution is the result of benevolent efforts, and that it be decidedly religious in its influence, without being sectarian, is the reasonable expectation of its friends. Among the appropriate means for securing such results, the Sabbath, with its religious services, is the most important. The excitement of visiting friends prevents, in a great measure, the benefit that may be derived from a proper observance of the day.

History.

In October, 1867, a Board of Trustees was formed, and a charter obtained. Money was secured and a site of about fifty acres, on high ground, in the western part of the city, was purchased. In June, 1869, the cornerstone of the first building was laid. During the summer the building was erected, and in October was occupied by the school. It is a plain, four-storied, brick building, containing sleeping-rooms for about forty pupils, and also a parlor, dining-room, kitchen, etc. It was designed for a girls' dormitory, but during the first year, furnished all accommodations, both school and boarding, for the entire school. It was much crowded, and the inconvenience of the arrangement was very great. In August of 1870, another building of the same style, but larger, containing sleeping-rooms for about sixty boys, besides temporary school-rooms, was completed. In the summer of 1871 this building was enlarged by a wing, providing rooms for about forty pupils, and other school-rooms. This entire building is now heated by steam. In the summer of 1880, a portion of the gift of Mrs. Stone, of Malden, Mass., was used in erecting an addition to the North Hall. This contains twenty-six sleeping-rooms and a large study hall.

The Legislature of Georgia, in 1870, appropriated to this school \$8,000. The same amount was received in 1871 and in 1873. In 1874 a bill was almost unanimously passed making an annual appropriation of \$8,000.

The bill was entitled "An act equitably to adjust the claims of the colored people to a share of the Agricultural Land Scrip." It made the appropriation on condition that the Board of Visitors of the University of Georgia should also visit this school; that the money should not be paid by the Governor till a commission of three members of the Faculty of the University of Georgia had approved the plan of the Trustees for the expenditure of the money, and that the school should educate, free of charge for tuition, one pupil for every member of the House of Representatives, to be nominated by the members. By the recommendation of Hon. G. J. Orr, State School Commissioner, the Trustees of the Peabody Fund appropriated, for the present year, \$1,000 for Normal Scholarships.

Nearly all the graduates, and many others who have left before finishing their course, are engaged in teaching during a part or all of the year. Besides these, during the three months of the summer vacation a large number of students engage in teaching, and it is estimated that over ten thousand children in Georgia are taught, annually, by those who have been connected with this institution.

Report of the State Board of Examiners.

ATLANTA, June 25, 1880.

Gentlemen of the Board of Visitors:

We have complied with the order assigning to us the duty of acting as a special committee to attend and prepare the report for the final examination of the Atlanta University, for the school year just closed, and as the result of our work, submit to you this report:

Eight from the Board of Visitors were present during nearly the entire examination, and the State Commissioners have special care, in behalf of the State, over this Institution, therefore a report in detail from us is useless.

For three days we listened to examinations of the scholars conducted orally by the teachers, and written examination work from the higher classes was laid before us. We were also present at the anniversary exercises of the Institution. It is with pleasure that we bear testimony in behalf of the accuracy and thoroughness manifested both by the teachers and scholars. We have never seen stronger proof of careful and successful teaching, and the discipline and government cannot be surpassed in any institution.

The scholars were neat in appearance, orderly in deportment, and serious in application. The teachers were remarkably proficient in their several departments, and the scholars seemed to be impressed with a deep-seated earnestness, calculated not only to advance the intellectual status of the colored race, but also to make of them better men and women.

Most of the scholars, coming from all parts of Georgia, go to their homes to enter upon the labor of teaching others, and a prominent feature of the Institution is the Normal. A graduate of the Oswego Normal, Mr. Farnham, has been added, within the last few weeks, to the corps of instructors, and from his services much good may be expected. The practical sciences are not neglected. A visit to the culinary department showed us that the female students had been thoroughly taught the art of cooking good dinners, without which even the intellect would pine and languish. Calisthenics, also, constitute a part of the training.

The anniversary exercises consisted of orations, essays and music. They were conducted in Friendship Church, and were listened to by a large crowd of attentive spectators. Here again the scholars gave evidence of the real worth of the college.

Rev. M. E. Strieby, D. D., of New York, delivered the diplomas to the graduates, and admonished them to perform through life their whole duty of appreciation to the State of Georgia, the liberality of whose legislators helped to keep up their Institution, to the people of the North who had aided in its foundation, and in the sight of God, from whom its continued prosperity came.

We found the buildings and grounds in the best of order, evidencing the same watchful eyes which overlooked the entire Institution.

The school rooms and furniture were entirely free from defacements of any kind, showing a marked difference in this respect between the Atlanta University and most other colleges.

It is hoped that a third building, at an expense of nearly \$50,000 will be erected before the end of next year for the further accommodation of the students.

The sum named has been left to the college, and will be obtained on the distribution of the Stone estate of Malden, Massachusetts.

An interesting feature is the Library, composed of a collection of about five thousand volumes, selected wisely for the purpose of interesting, as well as instructing, the scholars. To the Library there has been added, during the past year, three hundred new books of recent publication.

In connection with the Library is a Reading-Room, in which can be found the leading magazines and daily papers.

The future of the University seems truly bright, and a better opportunity can never be given our colored citizens for a thorough education.

We commend the entire corps of instructors, and must express the confidence which we feel in the capacity of the President, Mr. Ware, and in his fitness for the position which he occupies.

In conclusion, we think it proper to dwell for a moment upon the fact that the Atlanta University, besides the influence which it wields directly upon its scholars, reaches through the many who pass out from its walls as teachers, almost the entire colored population of our State. While the

mental man is being developed, the moral man is carefully trained, and temperance and religion are important parts of the instruction given.

From this college Georgia is sending out missionaries for the amelioration of a large class of her citizens. Who can doubt the wisdom of continuing the appropriation?
